SUMMARY

I am a Software Developer with a comprehensive understanding of object-oriented programming and software development. I am skilled in developing and implementing applications in Java using Spring Boot, and I have successfully integrated various features in financial applications to improve performance and user experience. My experience in working with tools like REDIS and Kafka enhances my ability to deliver efficient software solutions

EXPERIENCE

Software Development Engineer - 2

Upstox (RKSV Ltd.)

📅 05/2024 - Present 📍 Bengaluru

Financial services company providing stock brokerage and trading solutions

- Worked on National Pension Scheme feature integration in upstox app
- Documented technical specifications and project testing methods for future reference
- Used tools like REDIS, kafka to process and do faster operations

Software Development Engineer - 1

Upstox (RKSV Ltd.)

📅 06/2022 - 04/2024 📍 Bengaluru

Financial services company providing stock brokerage and trading solutions

- Developed an application using Java and Spring Boot to automate certain processes for a large financial services organization
- Used tools like REDIS, kafka, grpc to process and do faster operations
- Worked with websockets in java for live data streaming

System Engineer

Tata Consultancy Service

📅 08/2020 - 06/2022 📍 Bengaluru

Global leader in IT services, consulting, and business solutions

- Optimized existing Java applications to reduce response times by 30%
- Developed a Java-based web application that increased user productivity by 20%

EDUCATION

B.TECH

Heritage Institute of Technology

📅 08/2016 - 05/2020 📍 Kolkata

XII (CBSE)

Loyola High School

📅 06/2014 - 05/2015 📍 Patna

KEY ACHIEVEMENTS

National Pension Scheme Integration

Contributed significantly to the development and integration of various features in financial applications, improving performance and user experience

SKILLS

AWS

Cassandra

Data Structures

Java

Mysql

Algorithm

Problem Solving

JUnit

JWT

Kafka

OOPS

Redis

SpringBoot

WebSockets

gRPC

TRAINING / COURSES

B.TECH

Information Technology (9.23 C.G.P.A)

XII (CBSE)

Science (PCM) (92%)

PROJECTS

Audit Service For Aadhaar

📅 01/2022 - 03/2022

A project aimed at creating an audit service for Aadhaar

- Designed audit service for aadhaar using cassandra and spring boot
- Made full use of Java 8 Streams API to make the code readable
- Wrote junit test cases for the applications
- Worked on review comments to improve code quality, expandability and extensibility

ECMP Project

📅 05/2024 - 01/1970

A project focused on client enrollment for Aadhaar

- Worked on ecmp project for aadhaar for enrolling clients to aadhaar
- Improved the existing code to provide better performance
- Suggested various ways to implement new features and provide a good experience to the user

Risk Management Tool (Upstox)

📅 05/2024 - 01/1970

A project for developing a risk management tool

- Worked on tool to provide risk management for Upstox
- Integrated websockets for live streaming of data
- Integrated various APIs and gRPC to service
- Implemented rate limiting using token bucket algorithm to provide throttling on number of calls to API
